(Stock Code: 1397)

Baguio Actively Promotes its Waste Management and Recycling Business via Participating in Eco Expo Asia 2014

(Hong Kong, 30 October 2014) ----- **Baguio Green Group Limited** (“Baguio” / the “Group”) (Stock Code: 1397), a leading comprehensive environmental services provider in Hong Kong, participated a 4-day expo namely Eco Expo Asia - International Trade Fair on Environmental Protection to promote its waste management and recycling business. The booth is placed at waste management and recycling zone and held at AsiaWorld-Expo from 29 October to 1 November 2014 (Wednesday-Saturday).

Baguio provides high-quality sustainable waste management service to government, public & private organizations in Hong Kong. Our professional service portfolio covers full life cycle of waste management activities including avoidance, collection, disposal, destruction, reuse and recycling of wastes. Riding on the advantages of its existing customer and collection network, its monitoring system for operation, as well as its brand image for compliance and reliability, great potential for growth in this field is foreseen in future.

In addition, the Group has already established a recycle centre in Fanling to provide three critical recycling services: firstly, a sorting facility of approximately 20 tons a day to recycle plastics, papers, metals and glass bottles from the general wastes; secondly, a glass bottles processing line with capacity to crush 20 tons of waste glass bottles a day into cullet with size below 20 mm; and thirdly, a destruction line to securely destroy and, as much as possible, recycle 20 tons of confidential or sensitive materials a day. This centre has started operation in August 2014. By the end of the next 6-month period, the Group will have a territory-wide collection fleet and facilities for sorting and processing recyclables. With such set-ups, the Group will have a good foundation for expanding the recycling business in the years ahead. The Group will actively expand other waste management services such as confidential material destruction, clinical wastes and chemical wastes collection, which demand higher professional standards for handling and collection.

Organised by Messe Frankfurt (HK) Ltd and the Hong Kong Trade Development Council with the co-organisation by the Environment Bureau of the Government of Hong Kong Special Administrative Region (HKSAR), the 2014 show will serve as a networking platform enabling quality buyers from Asia to connect with green enterprises and government officials. With a number of pressing environmental challenges worldwide, the expo aims to be a holistic platform that offers greener solutions to both companies and individuals.

~End~

Baguio participated a 4-day expo namely Eco Expo Asia - International Trade Fair on Environmental Protection to promote its waste management and recycling business.

Baguio demonstrates recycling of papers and glass bottles.

About Baguio Green Group Limited (Stock Code:1397)

Baguio Green Group Limited is a leading environmental service provider in Hong Kong with over 34 years of history. It provides four major types of services, including cleaning services, landscaping services, pest management services and waste management and recycling services. Baguio is a leading market player in Hong Kong with approximately 14.3% market share in terms of the total industry revenue for the twelve months ended 31 December 2013, ranking first among the environmental service providers in Hong Kong in terms of revenue. Amongst approximately 1,600 environmental service providers in Hong Kong in 2013, less than 2% of market players are able to offer full range of services like Baguio. Looking ahead, Baguio is committed to become the most comprehensive and reliable environmental service provider in Hong Kong.
