

Press Release

**Baguio launches one-stop recycling platform "iRecycle"  
Collected over 64,000 plastic and glass bottles**

\*\*\*

**Recycling Through Redemption  
Promote Recycling to Build a Local Circular Economy**

[August 21, 2020 – Hong Kong] Baguio Green Group Limited (“Baguio” or “Group”; Stock Code: 1397.HK) is pleased to announce that “iRecycle”, a one-stop recycling platform, has successfully collected 64,303 plastic bottles and glass bottles after 100 days since its launch. In addition to contributing to environmental protection, users can also earn “points” to redeem rewards by recycling plastic and glass bottles. (Details can refer to Appendix 1)

“iRecycle” is a brand-new recycling platform launched by Baguio. Registered users can use the mobile APP powered by blockchain technology to recycle plastic bottles (Type 1 and Type 2) and glass bottles at designated collection points to earn “Points” to get rewards and discounts. The Group hopes that “iRecycle” can promote recycling and build regular recycling habits for the public by providing convenient and efficient recycling channels and strengthen the general public's awareness of environmental protection and recycling by the rewarding programme. (Details can refer to Appendix 2)

**Local Recycling**

Via the launch of the “iRecycle” mobile APP, the Group can develop a stable recycling network and increased recycling volume. Collected plastic bottles will be sent to the plastic recycling facility (expected to be completed by 2020) located in the Tuen Mun EcoPark which is a joint venture between Baguio and the partners for processing. Plastic bottles will be made into food-grade rPET flakes and high-end rHDPE pellets for recycling purposes; While glass bottles will be handled by relevant recyclers by shattering into glass sand recycling.

Mr. Ng Wing Hong, Chairman of the Group said, “Baguio has been committed to promoting sustainable environmental development and creating a harmonious living environment. The launch of “iRecycle” on one hand provides the public with a convenient, efficient and economical recycling solution to achieve “Make Recycling Easy”; On the other hand, provides a basis for collection and network for different resource recovery and recycling projects for the group in the future. The launch of “iRecycle” will provide a stable

recycling volume for the Group's plastic recycling facilities in the EcoPark in the future, achieving the goal of recycling 35,000 tons of plastic throughout the year.”

**In collaboration with various sectors to build a recycling-bonus points network, environmental groups expect the platform to promote recycling in the community**

The success of “iRecycle” relies on supports from different stakeholders. The wider the network we build, the better the results of recycling. Shell Hong Kong Limited fully supports “iRecycle” by opening up their service stations as bottle collection points. Anne Yu, General Manager from Retail of Shell Hong Kong Limited said, “As a partner of the “iRecycle” project, Shell Hong Kong Limited opens 38 service stations in Hong Kong, Kowloon and New Territories as bottle collection points. Users can earn bonus points by recycling bottles for rewards such as our convenience stores cash coupons and eco bag... etc.” Ms. Yu continued, “Shell is honored to participate in the “iRecycle” project and make good use of our service stations network to expand bottle recycle collection points. We sincerely wish “iRecycle” great success and will lead everyone to go green. It is hoped that Hong Kong can move steadily towards a sustainable future through joint efforts of the government, business communities and citizens.”

In addition, “iRecycle” also gains support from Sze Wo Chuan Company Limited and Crown Gas Stoves (Holdings) Company Limited to launch “door to door bottle collection services”. Joyce Lee, Managing Director from Crown Gas Stoves (Holdings) Company Limited said, “Crown Gas Stoves (Holdings) Company Limited always concerns and participates in green living. This is my honor to cooperate with Baguio and participate in the “iRecycle” project. We invite Sze Wo Chuan Company Limited to provide door to door bottle collection service to provide a better user experience. “iRecycle” users can have bonus points while contributing to environmental protection easily. Looking ahead, while green technology is widely applied in environmental protection, “iRecycle” can successfully enhance its corporate social responsibility, promote public awareness on environmental protection and build a sustainable future.”

Ms Linda W P Ho, CEO from Green Council said, “Although we have adopted sustainable consumption habits, waste is unavoidable in daily life. To reduce wastage, clean recycling practice is extremely important. “iRecycle”, it is a one-stop platform from collection to recycling of recyclables. It is a great way to encourage public recycling through incentives, while helping Green Council to make progress in local environmental education.”

Mr. Ng continued, “The launch of “iRecycle” relies on the efforts and support of partners and merchants. Plastic bottle and glass bottle recycling are the first step of the Group's recycling business development. Looking forward, we will develop different types of resource recycling project to establish a traceable recycling system and achieve the goal of "local collection, local recycling, local use”.

Mr. Ng Wing Hong, Chairman of Baguio Green Group Limited (frist left), encourages colleagues to bring plastic bottles to the office for recycling via the "iRecycle" for bonus points.

Raymond Wong, General Manager of Baguio Waste Management & Recycling Limited (first right) and Anne Yu, General Manager from Retail of Shell Hong Kong Limited (first left) launched the “iRecycle” project and promoted clean recycling.

Users can earn bonus points by recycling plastics bottles (No. 1 and No. 2) and glass bottles at designated "iRecycle" collection points.
